

Camelot Bridal Warranty

For over 60 years Camelot® has been handcrafting rings of the finest quality. The Camelot® signature stamped inside your ring is your guarantee of quality and value. Camelot® rings are designed and made in the USA to critical quality standards. Your Camelot® ring is warranted against any imperfection in design or workmanship for a lifetime.

Your Camelot® ring is guaranteed to contain the specific karat gold or platinum that is stamped inside the ring. Finishes on rings made from precious metals should be expected to 'soften' over time. This is a normal occurrence and is not a defect. Normal wear and changes in your finger size are not covered under this warranty. Camelot® will, whenever possible, resize, or refinish your ring for a nominal fee. Damage done to your ring due to sizing (and/or repair work) done outside of the Camelot® factory is excluded from this warranty. Damage, including loss of stones, as a result of excessive wear or physical abuse is excluded from this warranty coverage. We strongly recommend that Engraved Wedding Rings and channel set diamond rings *not* be sized.

All diamonds used in Camelot® rings have been graded according to the strictest standards and have been expertly selected for color, cut and clarity. While diamonds are the hardest substance known to man, a sudden blow could chip the diamond. Under normal use they can be worn for generations with no visible sign of wear. The total carat weight of your ring can be determined by referring to the Camelot® Catalog at your local Jeweler. For Mounted Diamond Engagement Rings, only the center stone carat weight is stamped in the shank of the ring.
